NamSys releases first web-based cash office system

Bolton, ON, February 20, 2008 – NamSys Inc. is pleased to announce that their newest product, Cashroom Controller, has been released to the market.

The web-based software manages all aspects of cash office operations for retailers including till management, sales auditing and safe balancing. The system also seamlessly interfaces with point-of-sale systems and cash counting equipment from major manufacturers.

Jason Siemens, Vice-President of Operations at NamSys, commented, “the market for cash office software has been stagnant for years and we feel that retailers are hungry for modern systems that give them centralized control and real-time visibility into store cash operations.”

NamSys Inc. was founded in 1989 and is a leading provider of cash logistics management software for banks, armored carriers, retailers and central banks. For further information, contact Jason Siemens at 1-800-668-1961 or visit our website at www.namsys.com.
